Lalit

## About Us

Established in 2006, TBM Technologies Pvt Ltd is an ISO 9001:2008 certified research driven Mobile-to-Next™ technology company, headquartered at New Delhi. We dare to dream of a better world tomorrow, because of the work we do today.

We develop and manage one of the most sophisticated software environments. We utilize advanced server and network clustering, extreme virtualization, cloud based technologies, mobile networks and smart devices to deliver massively scalable and redundant multi-lingual, multi-modal and multi-region location based solutions, both for consumers and enterprises. Millions of transactions are processed every day with better than 99.9% uptime.

Our solutions enhance lifestyles and save lives by enabling more effective communications between families, friends, special interest and research groups, colleagues, employers and employees, businesses and their customers.

Based on our proprietary technology and software we also deliver scalable and reliable solutions in partnership with telecom operators, including Airtel, Axiata, Verizon Wireless and Vodafone. By helping people to stay safe every day, during emergencies and disasters. Our open interface allows people to easily configure their mobile phones and smart devices to enhance their safety with our platform.

We invented and operate what is today the world's first and largest privately managed personal emergency and safety alerting hotline. In India 55100 EmergencyAlerts™ is the trusted 24x7 nationwide lifeline to family and friends (Dial 55100 tollfree from any Airtel or Vodafone mobile number or visit [www.55100.in](http://www.55100.in)). During natural disasters, such as floods, landslides and cyclones as well as bomb explosions, terrorist attacks and other personal emergencies we

have helped people to stay safe. To date we have helped hundreds of thousand people in distress and helped to save lives. We have also helped people reassure their worried families and others to locate their 'lost' family members, friends and employees.

We have invested over 400K person hours in researching and developing our proprietary core technology and software. After building the systems, we have spent thousands of hours in stress tests and live field trials during which we successfully completed work with Alcatel, Ericsson, Huawei, Lucent, Nokia, Nortel and Siemens telecom platforms.

Our entrepreneurial management team collectively has 90+ years firsthand business experience in 84 countries, including the United States, Latin America, UK, Europe, Middle East, Africa, India, China, South East Asia, Australia and Japan.

We also own an in-house research lab focused on sensor and smart device technology and their applications, particularly in personal safety and healthcare.

## **Our Values**

**Excellence**

**Integrity and  
transparency**

**Leadership  
by example**

**No such thing as  
"not my job"**

**Innovation**

**Betterment  
of society**
